## CHALET DARIA , VAL D ISERE

### PERFECT LOCATION

A magnificent chalet located in one of the best places in Val d'Isère. Designed and built exclusively for Hip Hideouts in 2016, Chalet Daria is arguably one of the best chalets in the resort. Seven bedrooms, an indoor swimming pool, a hammam and a massage room combine with local stone walls, reclaimed wooden beams creating an inspiring interior and offering a special property. Chalet Daria does not compromise on location with a ski-in and ski-out position and a luxury chauffeur service which is offered until 8 p.m.

The chalet has five floors. The main entrance of the chalet, facing west, leads directly to the cloakroom and the ski room. All the rooms in the chalet have a private bathroom and reclaimed wood and natural Vanoise stone floors. On the ground floor, you will find two large bedrooms, with the possibility of double beds or twin beds. Three other bedrooms are located on the upper floor, one with a magnificent south-facing balcony.

### LAYOUT

The main floor overlooking the living room is on the second floor, and is truly spectacular, with large double height windows letting in the afternoon sunlight. The fireplace creates a focal point for the room, and the ensemble has a large heated terrace offering privileged views over the valley. Dining at Hip Hideouts is a special affair, and Chalet Daria offers diners a beautiful view of the mountains during meals through large windows above the dining table. The upper floor contains a large mezzanine where you will find a place to relax, and the space is ideal for children who wish to play in the evening. Returning to the lowest level you will find two more bedrooms, both of which can be configured as double beds or as separate single beds. At this level, soothing spa facilities, a swimming pool with a counter-current system, a Moroccan hammam and a massage room for on-site treatments are at your disposal. There is also a large covered car park that can accommodate up to three cars.

### FACTS

Prices from: upon request
