EDEN

CHALET VIEUX PONT , VAL D ISERE

ROMANTIC, CHIC, UNIQUE

A fabulous new addition for winter 14/15. Perched on the cliffs overlooking the Isère gorges, this recently built chalet enjoys a unique location and perfectly captures the Hip Hideouts experience. Michel Covarel has designed a magnificent chalet, very luxurious, in a quality location. The interiors are simply wonderful. The chalet is spread over four floors and has a large living / dining room on the upper level. Going down you will find five bedrooms each with its own bathroom, one of which is built directly into the rock face of the river. On the top floor, you will find an elegant swimming pool as well as a hammam. Just 150 meters from the Le Fornet cable car, the Mangard blue run takes you to the front door.

Beautiful location next to its twin chalet, Vieux Pont, you arrive at the entrance of the chalet where there is a ski storage room and an imposing boot warmer. On this floor, there is also a master bedroom with double bed / two separate beds and a wraparound balcony. Going down one floor you will find three large double bedrooms configurable as separate beds, each with its own personality and style. One contains a carved door headboard, as well as a rock wall of the chalet that runs along the interior of the room.

LAYOUT

Going down to the lowest level you will find a bedroom with a breathtaking view of the old bridge accompanied by a small terrace. You will also find an indoor swimming pool with a counter-current system and a relaxing hammam. The highest floor of the chalet has the large living / dining area. With the windows facing in three directions, there is a tremendous amount of light flooding this room. The reclaimed wood table can seat up to ten people. There is also a card game corner with a table for four. The wood-burning fireplace is a key feature of the room, and a large flat-screen TV lets you watch sporting events or movies.

FACTS
